

RESEARCH PAPERS — BULLETIN REPRINTS — BULLETIN SUPPLEMENTS

Readers of the *Bulletin* may be interested to know that the Reserve Bank also publishes on an occasional basis a series of Research Papers, Bulletin Reprints and Supplements. The Research Papers are designed to present to a wider audience the results of the Bank's research endeavours and in most cases are rather more technical than the usual *Bulletin* articles. In addition, the Research Papers have been used to publish material discussing major policy issues, especially where these issues bear on the work of the Bank itself. Although the Bank fully supports the research work of its staff, the views expressed in Research Papers are those of the authors and do not necessarily represent the views of the Bank. Research Papers, Bulletin Reprints and Supplements are available free of charge on request to the Economic Department, Reserve Bank of New Zealand, P.O. Box 2498, Wellington, New Zealand. A mailing list is maintained for those persons or institutions who wish to receive the Research Papers as they are published.

The following is a list of Papers already published.
