

Series breaks - T1-T31

Series breaks occur when data are affected by survey changes that are not 'organic' but arise from one period to another because of factors such as the introduction of a new non-bank lending institution (NBLI) to the survey; an NBLI registering as a bank; the sale of assets; merger with another institution, reclassifications of survey data or a change in substance in business practice that interrupts a 'like for like' time series.

Series breaks for key balance sheet components for non-bank lending institutions (NBLIs) are displayed in the table below.

Table 1: Non-bank lending institutions series breaks (\$m)
